# Herambachandra College

A co-education college run by Brahma Samaj Education Society

## NOTICE

15.02.2016

GIA will be organising a seminar on "Career in Gems and Jewellery Industry" on 19.02.2016 at 2:00 P.M. in our college campus. The final year students are requested to attend. The details are given in the college notice board. Students from second year and first year interested in the career may also attend.

The gems and jewellery sector is one of the most important sectors of Indian economy and has also been one of the fastest-growing sectors in the past few years. The sector is highly export-oriented, and a major contributor to GDP and foreign exchange earnings of the country. This industry also generates a large number of employment opportunities in areas like designing, retail sales, merchandising, gemologist in support services, etc. As per the FICCI report, the domestic gems and jewellery industry has a potential to grow to INR 500,000 Cr by 2018. There is a dearth of skilled professionals in this industry. To bridge this gap and generate more employability opportunities for students as an alternative career option, GIA offers courses to facilitate the students by educating them.

Known as the "Harvard of the gems and jewellery industry", GIA (Gemological Institute of America) is a global public benefit institute that ensures public trust in gem and jewellery through research, education and laboratory services. An independent organisation established in 1931, GIA, the creator of the 4Cs of diamond quality™, also created the International Diamond Grading System™. GIA's campus and laboratory in India are located at Mumbai's Bandra Kurla Complex. From gemmology to jewellery design and retail sales, the Institute's education programmes reach more than 60 locations across the county.
