

SEMINAR REPORT

River Behaviour and Human Perception: A Field Based Analysis

The Department of Geography has conducted a one-day local level seminar on Fluvial Geomorphology. Dr. Rupam Kumar Dutta have delivered a lecture on River behaviour and Human perception. He highlighted about the fact that Rivers are basic natural resources supporting ecosystems and human societies, and the health of rivers is crucial to the Earth's sustainable development. Total 52 participants including both teachers and students attended the seminar. The question answer session was highly insightful.
